

Childhood Immunisation Survey

Childhood Immunisation Survey for Parents|Carers

Parents are advised to immunise their children to protect them from vaccine preventable diseases. Unfortunately, in the UK and locally, we are starting to see a steady decline in childhood immunisation uptake. We would really like to gain an insight from parents|carers as to why fewer parents are accepting the offer of immunisation for their children. We would love to hear your opinion regarding potential barriers that are preventing access to immunisation services and any suggestions as to how we can improve the delivery of immunisation services in your area. Your views will help us to continually improve immunisation services in the community.

We would be really grateful if you could spare a few moments to complete the survey <https://www.surveymonkey.co.uk/r/VXVTKMN>

This survey is fully anonymous. The results will be collated by the Screening and Immunisation Team (Derbyshire|Nottinghamshire) to improve service quality locally. Many thanks for your time.
